(LIBRARIAN'S) REPORT

1909-10

CORNELL UNIVERSITY LIBRARY

LIBRARIAN'S REPORT

1909--1910

To the President of the University:

SIR:—I have the honor to submit herewith my annual report on the University Library, for the year ending June 30, 1910.

The following table shows the additions made to the various more or less independent collections composing the University Library, and the present extent of each:

	Volumes	Present extent in	
	Added 1910-10	Volumes	Pamphlets
General Library.....	11,005	329,306	57,000
Law Library	1,336	41,174	
Flower Veterinary Library	198	3,604	
Barnes Reference Library	66	1,639	
Goldwin Smith Hall Library.....	461	1,631	
Stimson Hall Medical Library	56	979	
Agricultural College Library.....	1,512	4,232	
Forestry Library.....	11	1,131	
Totals.....	14,645	383,696	57,000

The President White Library, the four Fiske collections and the eight seminary collections are not separately enumerated in the table, but are included in the statistics for the general library. Of the additions to the general library (numbering 11,005 volumes), 3,745 volumes were gifts and of these, 283 volumes were gifts to the newly established library of the Mathematical seminary which has been officially named the Evans Mathematical Library, in honor of the late Professor E. W. Evans. Of the accessions to the other collections named in the table the gifts number 69 volumes for the Law Library, 13 volumes for the Flower Library, 22 volumes for the Stimson Hall Library, and 70 volumes for the Agricultural College Library.

The chief gift of the year was the fund of \$4,000 given by the late Goldwin Smith for the increase of the special library in Goldwin Smith Hall, and the

additions for the year to that collection have been almost entirely purchased from this fund. As heretofore the library is indebted to Ex-President White for many valuable gifts, of which fuller mention is made by Professor Burr in his report from the President White Library. Theodore Stanton, '76, has this year completed his gift of the Tauchnitz collection of British and American authors, numbering now 4,150 volumes, and has signified his intention to keep it up to date by presenting the future volumes which may appear. M. Louis LeBlois, of Paris, presented to the library a valuable series of reports of the proceedings in the Dreyfus case, rounding out the Dreyfus collection given by Mr. Stanton. From the Reverend J. A. Staunton, of Utica, we received a complete set of the Journals of the Diocese of Central New York, from its formation in 1868 to the present time; from Professor G. L. Raymond, a complete set of his writings on aesthetics; from Mr. W. K. Bixby, of St. Louis, a copy of the privately printed Inventory of the contents of Mount Vernon in 1810; from Mrs. Bayard Taylor, Repsold's *Geschichte der astronomischen Messwerkzeuge*; from J. F. Magee, Jr., his facsimile edition of the 13th century manuscript of the Bonus Socius collection of chess problems; from Comptroller Metz, the Manual of accounting and business practice of the city of New York; from Col. Milton T. Foreman, the elaborate Report on Transportation subways in the city of Chicago. From Senator Elihu Root and Congressman John W. Dwight the library has received some important government publications not distributed to the depository libraries. From the national government and from various state and municipal governments the usual supply of federal, state, and municipal documents has been received. To yourself and to various members of the University staff the library is greatly indebted for frequent and valuable additions. These, as well as the other gifts of the year, have all been promptly acknowledged, and a list of the donors is submitted as an appendix to this report.

Among the more important purchases of the year may be noted the rare 1512 edition of the first Spanish translation of Petrarch's *Trionfi*, and the 1524 edition of the Spanish translation of his *De Remediis*; facsimiles of the Wolfenbüttel manuscript of Tibullus, and of the miniatures of the Dresden manuscript of Galen; the Oxford edition of Homer's *Odyssey* in Proctor's Greek type; Grosart's edition of the poems of G. Daniel; Edmonds's *Lampart Garland*; the latest editions of the complete works of Ruskin, Thoreau, Mark Twain, Pinero, and Rydberg; Harington's translation of the *Orlando Furioso*, 1607; Hunter's edition of the *Magnum Rotulum Scaccarii*; Rivoira's *Lombardic Architecture*; Burnham and Bennett's *Plan of Chicago*; Latham's *English Homes*; Macfall's *French Pastellists of the 18th century*; Thiis's *Norske Malere*; the orchestral score of Wolf-Ferrari's *Vita Nuova*; Evans's *Scripta Minoa*; T. Edwards's *Antapologia*, 1646; Eyton's *Osteologia Avium*; Ganglbauer's *Käfer von Mitteleuropa*; Schubeler's *Viridarium Norvegicum*; Solereder's *Antomie der Dicotyledonen*; complete sets of the *Acta Sanctae Sedis*, 1865-1908; *Archiv für Hygiene*, 1883-1909; *Archives de Psychologie* 1889-1907; *Archiv des deutschen Landwirthschaftsraths*, 1877-1903; *Journal des Museum Godefroy*, 1873-1909; *American Monthly Microscopical Journal*, 1880-1902;

The Microscope, 1881-97; the *Färber-Zeitung*, 1889-1907; The Zoologist, 1843-1909. The following sets have been completed: the London Bankers' Magazine, the New York Bankers' Magazine, the publications of the Turin Academy of Sciences, the Proceedings of the American Society for Municipal Improvement, Punch, and the Tropical Agriculturist. The purchases made for the library of the College of Agriculture include the following important sets: Biometrika, the Botanical Gazette, the Proceedings of the American Pomological Society, Thoreau's complete works, and the Journal of the Royal Horticultural Society.

Dr. A. C. White, assistant librarian in charge of accessions and classification, reports that the accessions to the University Library have been promptly classified as received, including the accessions to the general library of the State College of Agriculture and the special entomological library of that college, which have been classified and their titles incorporated in the general series of shelf lists of the University Library. The books belonging to the Romance seminary and the Evans Mathematical library have been classified and card shelf lists of these special collections have been prepared. Dr. White has also, as heretofore, had the care of the binding of miscellaneous gifts and unbound book purchases and of the repair or rebinding of worn-out volumes. The binding of current periodicals has been under the immediate care of Miss Stubbs, the assistant in charge of periodicals.

The report of Miss K. Dame, assistant librarian in charge of the catalogue, shows that the number of volumes, pamphlets, and maps catalogued for the general card catalogue during the year was 14,004. For these 14,711 cards were written and 1817 printed cards were obtained from the Library of Congress. The printed card catalogue, issued by the American Library Association, of the facsimiles of manuscripts in modern languages owned by American University libraries has been received and filed. The absence of Miss Dame on sick leave for several months of the year made necessary the postponement until next year of some work in the analysis of serials and on the cataloguing of the manuscripts of the White Library which will now be taken up. During Miss Dame's absence Miss Fowler took charge of the work in this department, in addition to the routine work necessary on the Dante and Petrarch collections.

Mr. Hermannsson, the curator of the Icelandic collection, prepared a bibliography of the Sagas of the Kings of Norway and related Sagas and Tales which was published in May, forming volume III of "Islandica," the annual relating to Iceland and the Fiske Icelandic collection. In May, Mr. Hermannsson was granted leave of absence until October and is now in Denmark, engaged in investigations in the Scandinavian libraries, largely in the interests of the collection.

From the President White Historical Library, Professor Burr makes the following report:

"I have the honor to report a continuance of the generosity of Dr. White as well as the usual growth from the stipulated funds of the library. Some three months of the past year were spent by Mr. White in Spain; and thence he sent to the library some very interesting volumes—a copy of the rare old Mozarabic liturgy still in use at Toledo, the catalogue of the Columbian

Library at Seville, and sundry other things not easy to pick up outside of the land of their origin. In France, too, he bought for us some rare things, among them an exceedingly interesting body of autograph documents relating to the insurrection of the Paris Commune in 1871.

"The income of his Warfare of Science, too, has continued to make possible for us many purchases. Among the most notable are our acquisitions from the great Jackson collection on the Protestant Reformation. These include a copy of Lorenzo Valla's Notes on the New Testament, as published by Erasmus in 1505, the commentaries on the Gospels by Lefèvre of Étapes (1521), the letters of Oecolampadius and Zwingli (1536)—Conrad Pellican's copy with his marginal notes and an interpolated letter in his autograph,—Bucer's Commentaries (1530), the works of Urbanus Regius (1577), Beza's Icones (1581), and a multitude of other treasures. Among the acquisitions of the past year may be named an unpublished little Nuremberg chronicle of the Reformation period (1487-1547), an old manuscript copy of the earliest instructions of the Spanish Inquisition, and an addition to our body of manuscript witch-trials. In the field of the French Revolution, too, notable additions have been made."

Mr. W. H. Austen, assistant librarian in charge of the reference and loan departments of the general library, has been absent on leave since the end of March, and the routine work in the Reading Room has been carried on by the assistants, Miss Wilder and Miss Gregory, who have supplied the statistics concerning the use of the library. The library has been open 308 days during the year, and was closed only on Sundays and on five general holidays, only one of which fell in term time. The number of registered users recorded at the general delivery desk includes those who have drawn books from the general library only, and does not include those registered at the desk of the open shelf circulating library. This registration is as follows:

University officers.....	451
Students of all classes.....	430
Special borrowers	37

The number of reserved books in the reading rooms and seminary rooms in the library building is 13,366, the number kept in locked presses is 1,397, and the number reserved during the year at the delivery desk for special use was 1,712. The number of volumes from the general library at present on deposit in the various laboratory and department collections, in other buildings, is now 19,388. The number of volumes reported as missing from these collections during the year is as follows:

From the reading room shelves	39
From seminary rooms	6
From the open shelf circulating collection.....	3
From department and laboratory collections.....	149

During the year we have borrowed 150 volumes from fourteen other libraries and have lent 188 volumes to forty-seven other libraries. These loans, it may be noted, represent an expenditure of time, labor, and money frequently altogether disproportionate to the service rendered and the position taken by the Library of Congress, that "it is no more than fair to

expect that only in cases of real importance shall there be a resort to the device of inter-library loans," seems fully justified.

The following table gives the recorded use of books for the last two years. The use made of the Library, however, is shown only in part by these figures, as no record is kept of the large and constant use of the books on open shelves in the building, or of the use made of the books in the special libraries and those deposited in department collections:

REFERENCE AND DEPARTMENT USE		
	1908-09	1909-10
Volumes used in reading rooms.....	71,017	66,839
Volumes sent to seminary rooms.....	3,814	3,711
Volumes sent to departments	6,682	6,047
HOME USE		
Volumes from general library	20,311	20,766
Volumes from open shelf circulating library	5,860	5,921
Volumes lent to other libraries	155	188
Total recorded use.....	107,839	103,472

The slight decrease in the recorded use in the general reading rooms is probably largely due to the use made of the growing reference collection in Goldwin Smith Hall. The open shelf circulating collection continues to be largely used, especially by students. The number of students who have registered and taken books for home use from this collection was 855, as compared with 430 who drew books from the general library. On the other hand, the number of officers who have drawn books from this collection is only 179, as compared with 451 taking books from the general library. During the year ten volumes from this collection were reserved for class use in the general reading room. The number of readers who used the books of this collection in the room without taking them for home use was 3,832.

Mr. W. W. Ellis, curator of the shelves, reports that in addition to the daily inspection of new books for correction of possible errors in call numbers or bookplates, which must be done before they are sent to the stacks, or to the department libraries, the regular inventory has been taken. The inventory revealed 281 volumes standing on the wrong shelves as against 207 last year. The number of volumes missing from their proper places in the stacks, and unaccounted for when the inventory was taken, is this year 381 as against 351 last year. The number reported missing at the time of the inventory shows a slight increase from year to year; many of these, of course, are only temporarily misplaced, and, with the large numbers who have access to the shelves in the stacks, it is doubtful if any measures can prevent a considerable amount of misplacement. In the absence of Mr. Austen, Mr. Ellis has also undertaken the checking of the laboratory and departmental collections in June of this year, with the following results: 121 volumes could not be found at that time, 14 volumes were found at various places without record, and 24 volumes were found to be in the stacks though recorded elsewhere. During the year some progress was made in the exchange of duplicates, and 59 volumes and 278 parts have been received from other

libraries, while 43 volumes, 196 pamphlets, and 2,508 parts have been sent to other libraries on exchange account. The duplicates have also been rearranged in systematic order. In place of the annual dusting of the books by the janitors during the summer vacation, Mr. Ellis recommends the purchase of a vacuum cleaner, by means of which it might be possible to carry on the dusting at any convenient time, without annoyance to the users of the library, and with much less risk of injury to the bindings. The ordinary vacuum cleaner, however, is not well suited for dusting the books on the shelves, and it would seem to require a machine giving a combination of blast and suction to do the work satisfactorily; but the matter calls for further investigation.

The growth of the library since 1907, when the new stacks for the newspaper and document collections were fitted up in the former lecture room, has brought us again almost to the point of congestion in many places. In April, Mr. Ellis made a careful measurement of all the shelving in the library and found that, in the stacks and White Library, of the total shelf space available if every shelf were filled solidly with books, an average of over 79 per cent of the space is actually filled and in the White library 88 per cent is actually filled. But in a growing library, classified or arranged by subjects, it is simply impossible to fill the shelves to their nominal capacity. Vacant space must everywhere be left between classes to permit the insertion of new books and of books returned from circulation, for it is a physical impossibility to shift quickly any large collection of books. We must face the fact that a classified library necessarily must occupy more space than one not classified. How misleading are the ordinary estimates of shelf capacity may be judged from the following statement made by the Librarian of the Boston Public Library in 1909: "When the central building in Boston was first occupied it had an estimated shelf capacity of 1,500,000 volumes. Within less than 15 years we find the space severely taxed with 750,000; principally, of course, because the various classes or departments do not increase symmetrically."

In our own case this overcrowding of the shelves has again begun to be felt. More shelf room is urgently needed and, unless some steps are promptly taken to provide it, we shall soon have to resort again to the unsatisfactory and inconvenient expedient of packing away large numbers of our books in boxes, or removing them to some other building, and thus decreasing the usefulness of the library. I, therefore, respectfully urge that immediate provision be made for additional shelf room to relieve the congestion.

In the first term of the year, Mr. Austen gave his regular course of lectures on the use of books. In the second term the Librarian gave the usual course in general bibliography. The annual record of publications by the University and its officers has been prepared by Miss Dame. The list of donors has been prepared by Miss Thornburg.

Respectfully submitted,

GEO. WM. HARRIS,
Librarian,

— Experimental study of the antitryptic activity of human serum. (Archives of Internal Medicine, Feb., 1910, vol. v., p. 109.)

— On the resistance of human erythrocytes to cobra venom. (Jour. of Infectious Disease, Nov., 1909, vol. vi., p. 688.)

Also reprinted in Publications of Cornell University Medical College: studies from the Department of Pathology, 1909, vol. ix.

— Variation in resistance of human erythrocytes. (Proceedings of the Soc. for Experimental Biology and Medicine, Oct., 1909, vol. vii., p. 2.)

— and **S. Feldstein**. A new method of testing the interaction of ferments and antiferments. (*Same*, Dec., 1909, vol. vii., p. 61.)

— and **M. Rebling**. Avoidance of hemolysis in transfusion. (*Amer. Jour. of Surgery*, March, 1909, vol. xxiii., p. 268.)

Whetzel, H. H. End rot or fiber rot of seedlings. (*Special Crops*, Aug., 1909, vol. viii., p. 143.)

— Fiber rot disease of ginseng. (*Same*, Dec., 1909, vol. viii., p. 229.)

— Fiber rot or rust of ginseng roots. (*Same*, Aug., 1909, vol. viii., p. 146.)

— Spraying for alternaria blight. (*Same*, June, 1909, vol. viii., p. 104.)

— Summer use of concentrated lime sulphur. (Ninth Annual Report of the N. Y. State Fruit Growers' Assoc., Jan., 1910, p. 31.)

— and **V. B. Stewart**. Fire blight of pears, apples, quinces, etc. (Bulletin of the Cornell University Agricultural Experiment Station, Dec., 1909, no. 272, p. 29.)

— *joint author*. Peach leaf curl, by E. Wallace and H. H. Whetzel. (*Same*, April, 1910, no. 276, p. 155.)

Whipple, G. M. Questions in school hygiene. Syracuse, 1909. 8°. pp. 88. (Cornell Study Bulletins for Teachers, 4.)

— The effect of practise upon the range of visual attention and of visual apprehension. (*Jour. of Educational Psychology*, May, 1910, vol. i., p. 249.)

— The effects of prolonged rapid and deep breathing. (*Science*, 7 Jan., 1910, N.S. vol. xxxi., p. 26.)

— The instruction of teachers in school hygiene. (*Pedagogical Seminary*, March, 1910, vol. xvii., p. 44.)

— New instruments for testing discrimination of brightness and of pressure and sensitivity to pain. (*Jour. of Educational Psychology*, Feb., 1910, vol. i., p. 101.)

— A range of information test. (*Psychological Review*, Sept., 1909, vol. xvi., p. 347.)

Also separately reprinted.

— The spelling of university students. (*Jour. of Educational Psychology*, Jan., 1910, vol. i., p. 31.)

— The teaching of psychology in normal schools [report of the Committee of the Amer. Psychological Assoc. on the Teaching of Psychology]. (*Psychological Review Monographs*, April, 1910, no. 51, p. 2.)

— [Review of] Civics and health; by W. H. Allen. (*Economic Bulletin*, Dec., 1909, vol. ii., p. 381.)

Another review of the same in *Jour. of Educational Psychology*, Jan. 1910, vol. i, p. 48

— [Review of] The distribution and functions of mental imagery; by H. Betts. (*Jour. of Educational Psychology*, April, 1910, vol. i., p. 216.)

— [Review of] *Lehrerschaft und Schulhygiene in Vergangenheit und Gegenwart*; von K. Roller. (School Review Oct., 1909, vol. xvii., p. 584.)

— [Review of] *Memories of my life*; by F. Galton. (Jour. of Educational Psychology, Feb., 1910, vol. i., p. 107.)

— [Review of] *Schularztstätigkeit und Schulgesundheitspflege*; von G. Leubuscher. (School Review, June, 1910, vol. xviii., p. 430.)

— [Review of] *The teaching of spelling*; by E. R. Bailey and J. M. Manley. (Jour. of Educational Psychology, May, 1910, vol. i., p. 305.)

— [Review of] *Von der Kinderseele; Beiträge zur Kinderpsychologie aus Dichtung und Biographie*; von G. Bäumer und L. Driescher. (*Same*, April, 1910, vol. i., p. 219.)

— *associate editor*. The journal of educational psychology, 1910.

White, P. J. Some common weeds and how to destroy them. (Cornell Rural School Leaflet, April-May, 1910, vol. iii., p. 128.)

— Testing farm seeds. (*Same*, Jan., 1910, vol. iii., p. 66.)

Wilder, B. G. A brain of about one-half the average weight from an intelligent white man. (Proceedings of the Amer. Philosophical Soc., 1910, vol. xlix., p. 188.)

Also separately reprinted. Abstract of same in Ithaca Jour., 25 April, 1910.

— The brain of the American negro. (Proceedings of the 1st National Negro Conference, 1909, p. 22.)

Also separately reprinted, with 9 pp. of additional information.

— Definition of football: letter to the editor. (Ithaca Jour., 4 Nov., 1909.)

Also in Cornell Daily Sun, 5 Nov. 1909.

— The educational uses of the acanth shark: address before the Biological Soc. of Cornell University, March 21, 1910; abstract. (*Same*, 23 March, 1910.)

Issued under the title *Sharks as mental and physical pabulum*

— Lincoln and the negro: letter to the editor. (*Same*, 3 June, 1910.)

— Motive should count even when knowledge and judgment are lacking; letter to the editor. (Cornell Daily Sun, 16 Nov., 1909.)

— Simplified spelling: letter to the editor. (Ithaca Jour., 28 Jan., 1910.)

— Simplified spelling again: letter to the editor. (N. Y. Tribune, 13 Sept., 1909.)

Also in Ithaca Jour., 21 Sept., 1909.

— Simplified spelling and reason: letter to the editor. (Ithaca Jour., 5 Feb., 1910.)

— The statue of Robert E. Lee; letter to the editor. (Harpers' Weekly, 16 Oct., 1909, vol. liii., p. 5.)

Also in Ithaca Jour., 2 Nov., 1909.

— Who is "A. E. D."? Letter to the editor. (N. Y. Tribune, 14 Nov., 1909.)

— [Review of] The frog book; [by] M. C. Dickerson. (Nation, 30 Sept., vol. lxxxiii., p. 248.)

— *composer*. Last night: duet, with piano accompaniment and flute obligato; words by C. Winther [music by B. G. Wilder]. Ithaca, 1909. 4°. pp. 4. *Music*.

Willcox, W. F. Carroll D. Wright—obituary note. (Jour. of the Royal Statistical Soc., March, 1909, vol. lxxii., p. 67.)

— The college in the university. (Jour. of the 10th Annual Conference of the Assoc. of Amer. Universities, 1909, p. 31.)

— Death rate from tuberculosis. (Monthly Bulletin N. Y. State Dept. of Health, March, 1910, N.S. vol. v., p. 88.)

— Distribution of the Nobel prizes. (Science, 29 Jan., 1909, N.S. vol. xxix., p. 184.)

— Divorce statistics: letter (N. Y. Times, 24 Jan., 1909.)

— The economic loss to N. Y. State in 1907 from tuberculosis. (Transactions of the 6th Internat. Congress on Tuberculosis, 1908, vol. iii., p. 37.)

— National bureau of health: letter to Professor Irving Fisher. (Charities and the Commons, 13 Feb., 1909, vol. xxi., p. 974.)

— Obituary note on Richard Boeckh. (Bulletin of the Amer. Economic Assoc., June, 1908, vol. i., p. 113.)

— The outlook for American statistics: address as acting president of the Amer. Statistical Assoc. (Quarterly Publications of the Amer. Statistical Assoc., March, 1910, vol. xii., p. 43.)

Also in Amer. Jour. of Sociology, March, 1910, vol. xv., p. 633. Also separately reprinted.

— Statistics of marriage and divorce in the United States. (Bulletin de l'Institut International de Statistique, 1909, vol. xviii., p. 305 [French text] p. 609 [English text].)

— Stature of the Japanese: letter. (N. Y. Evening Post, 12 June, 1908.)

— The tuberculosis war: letter. (N. Y. Tribune, 24 April, 1910.)

— The twelfth session of the International Statistical Institute at Paris, 1909. (Publications of the Amer. Statistical Assoc., Dec., 1909, N.S. vol. xi., p. 647.)

Also separately reprinted.

— What are the causes of the present high range of prices? (Jour. of Commerce and Commercial Bulletin, 3 Jan., 1910, 2d sect., p. 2.)

— [Review of] Statistik und Gesellschaftslehre; von G. von Mayr. 3^{er} Bd.: Sozialstatistik. (Political Science Quarterly, June, 1910, vol. xxv., p. 353.)

— [Review of] *Statistique internationale du mouvement de la population*. (Bulletin of the Amer. Economic Assoc., Sept., 1908, vol. i., p. 218.)

— [Review of] Sundbärg, *Aperçus statistiques internationaux*. 10^e année. (*Same*, June, 1908, vol. i., p. 144.)

— *joint editor*. Letters, lectures and addresses of Charles Edward Garman, a memorial volume, prepared with the coöperation of the class of 1884, Amherst College by E. M. Garman. Boston, 1909. 8°. pp. xiii. + 616. 2 *portrs*.

Williams, C. H. The schematism in Baldwin's logic. (Philosophical Review, Jan., 1910, vol. xix., p. 34.)

Williams, H. B., and C. G. L. Wolf. Protein metabolism in cystinuria. 11. (Jour. of Biological Chemistry, Aug., 1909, vol. vi., p. 337.)

Williams, H. S. The migration and shifting of Devonian faunas. (Popular Science Monthly, July, 1910, vol. lxxvii., p. 70.)

— *and others*. Watkins Glen-Catatonk folio, New York, by H. S. Williams, R. S. Tarr and E. M. Kindle. (U. S. Geological Survey. Geologic atlas of the United States no. 169. 1909.)

Also issued in octavo form, called Field ed., pp. 242.

Williams, W. L. The castration of crypt-orchids. (Amer. Veterinary Review, May, 1910, vol. xxxvii., p. 173.)

— The 11th International Veterinary Congress at the Hague, Sept., 1909 [editorial]. (*Same*, Nov., 1909, vol. xxxvi., p. 149.)

— The nomination of the New York State Board of Veterinary Examiners. (*Same*, July, 1909, vol. xxxv., p. 472.)

— The veterinary profession and the state [editorial]. (Veterinary Jour., Oct., 1909, vol. lxx., p. 492.)

Winters, J. E. Intestinal infections in children: philosophy of feeding in intestinal infections on the basis of infant physiology. [New York, 1910.] sm. 8°. pp. 16.

Wolf, C. G. L., and H. C. Thacher. Protein metabolism in Addison's disease. (Archives of Internal Medicine, 1909, vol. iii., p. 438.)

— *See also* Ewing, J., and C. G. L. Wolf. The clinical significance of the urinary nitrogen. 111.

— *See also* Lambert, A., and C. G. L. Wolf. Protein metabolism in pneumonia.

— *See also* Williams, H. B., and C. G. L. Wolf. Protein metabolism in cystinuria.

Woolsey, G. Post operative intestinal obstruction. (Surgery, Gynecology and Obstetrics, June, 1910, vol. x., p. 608.)

Wright, A. H. The anura of Ithaca, N. Y.: a key to their eggs. (Biological Bulletin, Jan., 1910, vol. xviii., p. 69.)

—— and **A. A. Allen**. The early breeding habits of *amblystoma punctatum*. (Amer. Naturalist, Nov., 1909, vol. xliii., p., 687.)

—— — The increase of austral birds at Ithaca. (Auk, Jan., 1910, vol. xxvii., p. 63.)

—— — Regular summer crossbills at Ithaca, N. Y. (Same, p. 83.)

—— See also **Reed, H. D.**, and **A. H. Wright**. The vertebrates of the Cayuga Lake Basin.

APPENDIX

TO THE

REPORT OF THE LIBRARIAN

1909-1910

LIST OF DONORS OF BOOKS TO THE UNIVERSITY LIBRARY, INCLUDING THE SPECIAL LIBRARIES

	VOLS.		VOLS.
Abbott, E. S.....	2	American Saddle Horse Association	2
Abel, Miss A. H.....	2	American Scenic and Historic Preservation Society.....	1
Academia Polytechnica do Porto	1	American Shropshire Association	1
Academia Scientiarum Imperialis, St. Petersburg	1	American Society of Civil Engineers	1
Adams, C. F.....	1	American Type Founders company	2
Adams, J. Q.....	3	American Water Works Association	1
Adelaide University.....	1	Anderton, B.....	1
Adler, S. L.....	1	Andover Theological Seminary.	1
Alabama—State Departments..	1	Andrews, A. L.....	1
Albert I., Prince of Monaco....	2	Andrews, E. B.....	1
Alinari Frères.....	2	Anonymous	6
